Re: Regulation Docket. No. 56 – Pre-filed Comments of Gary Myers for Dec. 5, 2019 PSC Meeting In Response to Exec. Director's Directive to DNREC Dated November 21, 2019

Dear Chair and Commissioners:

This is in reply to DNREC's request of today to delay consideration of its violation of the Renewable Portfolio Standard Cost Cap Calculation until the end of the Current Compliance Year in May, 2020. With the built in timing schedule in the regulation this actually means a full year delay. DNREC had the opportunity of the entire last legislative session to introduce legislation amending the Cost Cap. Indeed draft bills to do so began circulating in January, but never had adequate support to be filed. There is no guarantee such a bill, that would be tantamount to an electric price increase, would be any more successful in 2020, an election year. Indeed, DNREC could have complied with, or changed the Cost Cap anytime in the last nine years since the Cost Cap first passed. Instead DNREC has done everything they could to avoid a freeze since the Cost Cap was exceeded, probably in 2012.

It is well past time ratepayers see some justice. Please leave this item on the Dec. 5 agenda.
